

# Specs & Standards for the Web

## Tip Sheet

**Specs & Standards** provides you access to military specs/standards, as well as federal and industry standards. ASCII text military documents are available with enhanced ASCII text searching and facsimile images of actual documents.

### To Start

1. Select your Desktop login link  
OR  
Go to <http://www.ihserc.com>, click the Subscriber Login button, enter your user name and password, and click the Submit button.
2. Click Specs & Standards.

### To Exit

Click the Logout button.

### For Help

For Help, click the Help button. For additional assistance, call the IHS Customer Service Department: **1-800-447-3352**.

## Search Screen

**Search**

Select filters, enter terms, and click Search.

☐ Industry Standards ☐ ANSI Approved ☐ DoD Adopted ☐ Government Documents ☐ New/Revised active/historical

**Document Number**  
**Organization**  
**Keyword**  
**Military ASCII Text**  
**Federal Supply Class**  
**Document Type** (All Document Types)

**Search** **Clear ALL** **Clear all but filters**

- Spaces between terms=**AND** search
- Semicolons (;) between terms=**OR** search
- Text within quotations (")=an exact phrase

### a New Search/Priority Documents/Search Results/Query

Enable you to customize your searches. Click Load or Save Query buttons to load a previously saved query or to save a current query. Click the Priority Documents link to access Priority Document functions. Check Search Filter boxes to refine your searches according to the corresponding criteria.

### b Search Fields

Enter Search terms in search fields. Click the Search button to start your search. You have the option of searching by Document Number, Organization, Keyword, Military ASCII Text, Federal Supply Class or logical combinations of several search fields. Click a Text link to select terms to add to a search field. For Example: Click the Document Number link to see a list of document numbers. Select the desired numbers and click add. The selected numbers are added to the search field.

### c Document Type

To change the default setting, "All Document Types," click the Document Type link. Check boxes and click Add. Selected document types are pasted onto the search page.

### Specification Sheet (Slash Sheet)

A Slash Sheet covers unique items for a single style, type class, grade or model of an item. Use wildcards to search for slash sheets, **22710/\*** displays all the slash sheets associated with 22710.

### AND Search Operator

Spaces between search terms indicate an AND search resulting in data containing the terms entered. For example, if you enter the terms *water tanks* (separated by a space) in the Keyword field, the program locates documents containing both terms.

### OR Search Operator

Semicolons between terms act as an OR operator, retrieving documents with either term. For example, if you enter the terms *fuel; tanks*, in the Keyword field, the program retrieves documents with either fuel or tanks. This widens the scope of your search.

### Exact Phrase Searching

Quotation marks around groups of terms specify that exact terms be located. For example, entering the terms, *"hexagonal head bolts"* locates data containing this exact phrase.

### Wildcards

The asterisk \* wildcard represents an unspecified number of characters. It widens the scope of your search. Use wildcards after single terms only.

Examples:

Keyword Search: **cap\*** = **cap**, **capacitor**, **capacitors**, and **caps**.

Document Search: **22759\*** = **22759/15B**;  
**brak\*** = **brakes**.

### Search Results

Click the View Document icons to access the document. Choose PDF or ASCII Text format (if available).

Recent updates are preceded by an asterisk and highlighted in grey.

Click the Document Number to view Reports pages.

Click the Priority Document check boxes and click the Priority Doc Button add documents to your priority list.

View Document	Document Number (Reports/Outline)	Status A/H/C	Publication Date	Document Title	 Select/ Add
